## OUTLOOK 2015

Source: Coca-Cola Co.

Full year EPS growth is expected to be the same as 2014.

Income incurs slight headwind due to the appreciation of US dollars against other currencies regardless to hedging method.

The underlying effective annual tax rate of 2015 is estimated to be 22.5%.

Net share repurchases are targeted to be \$2.0 to \$3.0 billion.

## SUMMARY OF QUARTER 1-2015 EARNINGS REPORT

## Overview

2015 is viewed as a transition year. Coca Cola is still on the early stage to deliver its new global product strategies which is expected to accelerate growth later on. The management commits to achieve long-term value by combining global brand portfolio and distribution system.

Seasonal pattern for the first quarter of 2015:

- Uptrend in revenue: long holidays increase the consumption of beverage.
- Downtrend in revenue: Expense cost of long-term debts from previous fiscal year.

Litigation effect: new provision in Venezuela is detrimental to Coca Cola revenue as estimated in its last year's outlook.

Currency translation results headwind on income.

Global revenue is slightly moving up in total.

Operation cash flows go up 48 percent due to efficient management of working capital and seasonal patterns regardless to offsetting by unfavorable result of foreign currency adjustments.

#### **Business by regions**

Eurasia and Africa: While the revenue growth is positive and expected to remain favorable for the whole year in Africa market, it is bearing high single digit decline in Russian market.

Europe: Unit case sales and concentrate sales<sup>1</sup> are expected to be in line generally for the full year at 1 percent and 5 percent, respectively. Still, positive growth in sales is offset by high input cost and marketing cost combined with headwind effect from exchange rate movement which left income before tax grow negatively. They continue to leverage innovation and diversify product portfolio in European market.

Latin America: Organic revenue  $\operatorname{growth}^2$  is partially offset by higher input cost and increased marketing investments. A new provision imposed on threshold of profit margin enacted in Venezuela since 2014 has unfavorable impact on operating results.

North America: Enjoy a strong growth in net revenue and income before tax. These positive results are expected to be in line for the whole year.

Pacific Asia: Strong growth in Indian market is mostly offset by decline in Chinese and Japanese market leaving a slight growth rate in total.

<sup>&</sup>lt;sup>1</sup> Concentrate sales represent the whole amount used by or sold in of finished beverage. Meanwhile, unit case represents a unit of measurement of 24 eight-ounce servings of finished beverage.

<sup>&</sup>lt;sup>2</sup> Organic revenue is a non GAAP item which excludes or adjusts for the impact of foreign exchange rate and divestitures and acquisition.

## ANALYST'S OPINIONS

We give Coca-Cola Co. (KO:NYSE) stocks a BUY after considering the firm performance over the last five years, its long-term perspective and comparing with industry performance.

As Coca-Cola Co. is on the first stage of new global product strategies, it is clearly that most of indicators show not very impressive performance over the last two years. While profitability ratios concluded on diminishing return on investment since 2012, Coca-Cola Co. has been experiencing increasing leverage. Nevertheless, its activity has been on the right track with improving cash conversion cycle over years. This is also due to the dominating purchasing power of Coca-Cola Co. over suppliers and leading position in non-alcoholic beverages over the world.

A detailed comparison over the industry indicates Coca-Cola Co. stock to be a blue-chip investment with low beta, stable dividend payments, lower P/E compare with that of industry. However, the new product strategy launching has been detrimental to the firm earnings which worsened KO growth rate than the industry.

In view of long-term investment, KO stocks can be considered as an attractive asset to own for two reasons. Firstly, the new product strategy processed globally is expected to provide high growth rate later on. We also regard this project as an product innovation strategy to its maintain leading position in the industry. Secondly, under marketbased approach, KO stock price is currently underestimated as compared with industry. In conclusion, the outlook of Coca-Cola Co. operation together with its currently undervalued price make its stocks appealing to own.
